Experience

Technology World Creater Pvt Ltd

Mar. 2024 – Jan. 2025

Full Stack Developer

Nagpur, Maharashtra

- Deployed a full-stack MERN application on Hostinger with complete production setup and optimisation.
- Architected a large-scale React.js application (80+ pages) using production-level architecture and modern development practices. Collaborated in a 4-person development team using Git workflows, pull requests, and code reviews to maintain code quality.
- Constructed a corporate website using Next.js with advanced animations, responsive design, and cross-device compatibility.
- Applied responsive frontend interfaces with React.js, TypeScript, and Tailwind CSS for enhanced user experience across all devices. Configured Ubuntu servers and deployed production applications using Nginx, ensuring 99.9% uptime.

IXOLabs Pvt Ltd

Jul. 2023 – Jul. 2024

Software Developer Intern (Remote)

Pune, Maharashtra

- Launched 6 custom WordPress websites with themes and animations
- Structured responsive WordPress layouts using Elementor page builder with custom forms, e-commerce integration, and enhanced performance using caching and minimal plugins.
- Introduced WordPress e-commerce solutions with product catalogues and shopping cart functionality.
- Configured and customised WordPress plugins for contact forms, SEO optimisation, and website functionality enhancement.
- Optimised WordPress sites for SEO and performance, boosted client engagement by 25%, and improved search rankings by 30% through SEO strategies.
- Collaborated with cross-functional teams using Agile methodologies to deliver projects on time and within budget

Projects

SonicFlow

MERN Stack · Microservices · CloudAMQP · Redis · Multer · ImageKit

- Built a production-grade music streaming web app using microservices architecture — Auth, Notification, Music, and Client services communicating asynchronously via CloudAMQP message queues.
- Implemented dual-role system: Artists can create songs, albums, profiles, and playlists; Users can stream and discover music with a seamless listening experience.
- Automated welcome email notifications on user registration via a dedicated Notification microservice.
- Leveraged Redis for caching and session management, reducing database load and improving response times.
- Handled audio and image uploads using Multer + ImageKit for optimised cloud-based media storage and delivery.

NeuroBank

MERN Stack · Microservices · CloudAMQP · MongoDB Sessions · JWT Auth

- Architected a full-scale digital banking platform with 5 independent microservices — Auth, Notification, Account, Transaction, and Client — each with isolated responsibilities and codebases.
- Implemented inter-service communication using CloudAMQP publishToQueue / subscribeToQueue patterns for reliable async messaging.
- Built complete banking user journey: register → email notification → login → dashboard → create account → send & receive money.
- Secured sessions using MongoDB session store for persistent, server-side validated authentication in a production environment

Education

Nagpur Institute of Technology

Jul. 2019 – Jul. 2023

Bachelor of Engineering in Information Technology

Nagpur, Maharashtra

Skills

Frontend Developer : React.js, Next.js, Redux Toolkit, RTK Query, Tailwind CSS, HTML5, CSS3, JavaScript, TypeScript, RESTful APIs
Backend Developer : Node.js, Express.js, MongoDB, RESTful APIs, JWT Auth, ENV, MVC Architecture, Redis, Cloudinary, RateLimiting
Tool & Technologies : Git, GitHub, GitLab, PostMan, Docker, VS Code, React Native, Vercel, Expo Go, Sanity (CMS), Responsive Design

Achievements / Extracurricular

- GitHub Portfolio: Maintained 10+ active repositories with comprehensive project documentation
- Performance Optimisation: Achieved 40% improvement in application performance through code optimisation
- Project Leadership: Successfully led 6 projects from conception to deployment with measurable business impact
- Technical Writing: Composed detailed documentation, improving team knowledge sharing by 35%
- Open-Source Contributions: Active contributor to open-source projects and community learning resources
- Continuous Learning: Regularly updating skills with the latest JavaScript frameworks and industry best practices
